(54) Title: FLEXIBLE TRI-FOLD GARMENT BAG

(57) Abstract: A flexible tri-fold garment bag (200) has an elongate integral body with a front (202) and rear (222) flexible panel and a peripheral side panel (262) connected to the front and rear flexible panel along the mutual peripheral edges thereof. A top flexible strap handle is connected at the top of the bag to the rear panel (222), and a mid flexible strap handle (216) is connected to the rear panel at the upper end of a lower one-third of the bag body. The top handle is longer than the mid handle so that the thickness of the bag body when filled with garments can be accommodated.

INTERNATIONAL SEARCH REPORT

International application No.

PCT/US03/36116

Box I Observations where certain claims were found unsearchable (Continuation of Item 1 of first sheet)

This international report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claim Nos.:
because they relate to subject matter not required to be searched by this Authority, namely:
2. ☒ Claim Nos.: 19
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:
Please See Continuation Sheet
3. ☐ Claim Nos.:
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box II Observations where unity of invention is lacking (Continuation of Item 2 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

1. ☐ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest

☐
☐

The additional search fees were accompanied by the applicant's protest.

No protest accompanied the payment of additional search fees.

INTERNATIONAL SEARCH REPORT

Continuation of Box I Reason 2:

Claim 19 does not appear to be supported by the description. There doesn't appear to be any description of a top pocket with an outer section, a peripheral gusset connected along an inner peripheral edge of said outer section to said rear panel top section and connected along an outer peripheral edge of said outer section to an inner peripheral edge thereof to said rear panel top section and connected along an outer peripheral edge thereof to a peripheral edge of said outer section. The outer section and inner and outer peripheral edges have not been clearly described or identified in the drawings.
